

What our
customers say

Hear what our customers have to say about BSI Compliance Navigator

The current changes to the regulatory landscape for medical devices are calling for increased requirements for safety and put patient welfare at the core of the medical device manufacturers' processes. BSI Compliance Navigator is the only tool on the market that has been developed to help medical device and in vitro diagnostic manufacturers effectively manage their UK and EU regulatory information and requirements so that they can gain competitive advantage, get to market faster and maximize ROI.

"We were trying to manage the process of standards notification... and how they were able to run gap analyses to make sure we were compliant with our products. We looked at three companies and BSI Compliance Navigator best fitted our needs at the right price at the right time."

Regulatory Affairs Manager, USA

We spoke to our customers and asked them how Compliance Navigator has helped them to manage their regulatory information.

Team-wide access

“Getting information to those people that need it is a key element of compliance.”

CEO, USA

Get it right

“An expert has already looked into it with the highlights [in the expert commentary feature], so you don't need to worry so much about interpretation of the regulations because that has already been done.”

Senior Regulatory Affairs Specialist, USA

Save time

“We have a fairly diverse product portfolio and [before Compliance Navigator] it was taking up a lot of time trying to maintain standards in terms of working more efficiently.”

Senior Regulatory Affairs Specialist, USA

“You save money if you save time, it is as simple as that at the end of the day.”

Compliance Officer, USA

Find standards fast

“It is the convenience of going to a one-stop shop for all the standards that is a key benefit.”

Regulatory Affairs Officer, UK

Reduce risk

“It certainly helped with risk avoidance or reducing risk of non-compliance. Before Compliance Navigator we did have standards in place, but we might not have had the correct edition or applicable version because we did not receive regular updates.”

Regulatory Affairs Officer, USA

“It has already started preparing us for the new MDR.”

Compliance Officer, USA

Miss nothing

“It is so much easier now. In the past I had to usually call somebody and find out things. Or, I had to do a specific online search. Now you just have easy access on hand. I can just immediately go through a list of standards and just click on the particular one I need and it is there, right before my eyes.”

Compliance Officer, USA

“It's useful knowing what's coming next.”

Senior Quality Engineer, USA

Getting started is easy

Compliance Navigator is easy to implement and use. Our customized training sessions gather information on your workflow challenges and highlight relevant solutions to ensure a straight-forward transition to the service.

“The whole process took about two months. We started off in May and by July we were using Compliance Navigator”

CEO, USA

“The BSI rep also recorded those web-ex videos and they were posted to a place where we could utilize them with our employees.”

Senior Quality Engineer, USA

“The system is easy to navigate and use. This made the training we did somewhat superfluous. I could generally have self-trained on the system.”
